- Production Budgets
- Most popular genres
- Average of and most frequent runtimes

Results

- Over the past decade, remakes and sequels have consistently appealed to audiences, leveraging familiarity and nostalgia.
- Documentaries have achieved significant success, captivating viewers with their engaging storytelling based on real-life events.
- Genres such as drama, comedy, thrillers, horror, and action have consistently performed well at the Box Office, attracting diverse audiences and delivering compelling entertainment experiences.

Conclusions

- The analysis recommends that Microsoft focuses on producing sequels, prequels, and remakes as these film types have consistently performed well at the Box Office. This strategy allows Microsoft to leverage existing popularity and reduce the pressure of producing original content.
- Another recommendation is to optimize the duration of their films. The analysis reveals that films with an average runtime of 86 minutes have been successful. By aiming for this duration, Microsoft can ensure that their films are engaging and resonate with audiences.
- Additionally, the analysis suggests that Microsoft refines their production budget. With top studios producing a high volume of films, having a well-defined budget is crucial to minimize the risk of production failure and revenue loss.
